ABOUT

I am an ICT Multimedia student currently doing my 3rd year at the Cape Peninsula University of Technology. My current objective is to improve my skills and develop my passion as a Front-End Developer by consistently learning and building projects. My drive and dedication for coding has helped me get this far and I look forward to seeing how I can contribute to this fast-paced industry!

SKILLS

UI Design	React
UX Design	Angular
SEO	PHP for Wordpress
HTML	Wordpress
CSS/SCSS	
Javascript	

PROJECTS

APPLE UI CLONE

appleuiclone.web.app

- A responsive website cloning the UI of the apple website (South Africa).
- Demonstrates my ability to take any given design and develop an identical product.
- Technologies used: HTML, SCSS and Javascript.

COVID-19 STATISTICS APPLICATION

covid-statistics-app.web.app

- An application that displays the confirmed cases, recovered and deaths related to covid-19 worldwide or by the country chosen by the user.
- Demonstrates my ability to consume third party API's.
- Technologies used: HTML, SCSS and Javascript.

COVER LETTER

Greetings, To whom it may concern

I am a 3rd year student studying ICT at the Cape Peninsula University of Technology. During the course I have gravitated towards the Multimedia applications stream due to my passion for design and development. Because of this I invest a lot of my time and efforts into improving my skills in these fields so that I can contribute to any company that finds them valuable.

There are many technologies and software that I use to assist me in this field, however, the most exciting part of the work I do is learning new technologies that can help me in many different ways. The process of learning and implementing what I have learned successfully has an amazing feeling to it, which is why I am able to adapt to any technology being used fairly quickly.

I love being able to take a design and create something that a user can use and feel satisfied with and seeing how my friends, family and fellow students react to the projects I have built is a huge motivation for me to continue pursuing a career in front-end development.

I aim to contribute to any person or company looking for my set of skills by assisting in developing front-end products that any client will feel proud to have. Please feel free to contact me via phone or email to schedule an interview to find out more about me and if you are looking to see some of the projects I have worked on, please visit abongile-william.web.app. I look forward to hearing from you!

Sincerely
Abongile William
